# What is NESI?

NESI Forum is the only Global Forum on New Economy and Social Innovation, which brings together the main change-makers and opinion leaders working for a new economy, more sustainable, social, based on values and aimed at the common good. NESI will gather more than 500 speakers, opinion leaders and change makers from all over the world in Malaga, Spain, on 19th-22th April, 2016.

NESI Forum is a multi-stakeholder event aimed at citizens, entrepreneurs, companies, cities and organizations with the aim of exploring ways of collaboration and co-create the first global Manifesto for a New Economy.

[www.neweconomyforum.org](http://www.neweconomyforum.org)

NESI is supported by the Global Hub for the Common Good Foundation a think-tank with international experts, created in 2015 with the vision of boosting a new social, economic and political model geared towards a common good.

NESI Forum is possible thanks to the support of Ecoemprende (local partner of the Global Hub for the Common Good), Málaga City Council, Diputación de Málaga, University of Málaga, and the participation of a large number of organizations and networks that work in collaboration to implement new economic models that contribute to creating more just, inclusive and prosperous societies.

# Co-creating a common narrative

Despite the good intentions of the Sustainable Development Goals we are still coping with problems such as poverty, inequality or the violation of human rights.

Under the current economic system new problems have arisen such as the climate change or forced migration.

**It is time to create a new narrative and to set up the principles of a new economy.**

On the other hand, so-called New Economy models (NEMs) are trying to demonstrate that other economic model is feasible. Models such as Social&Solidarity Economy, Economy for the Common Good, Sharing Economy (based on values), Circular Economy, Fair Trade, Social Enterprises, Transition Town or Degrowth are demonstrating both theoretically and practically that there are alternatives.

For all the above, our aim is to strengthen collaboration among all the NEMs and the organizations, movements and people who dream and work for a new democratic and people-oriented economy.
